

Simpson Associates
The Data Analytics Company

Data Analytics Accelerator for Higher Education

At Simpson Associates data is in our DNA. As a Microsoft Gold Partner and proven experts in the Higher Education sector, we have worked with many UK Universities, helping them overcome their data challenges, and implementing a range of data and analytical solutions using the Microsoft Platform, including Power BI and other real time reporting solutions.

Data consolidation into a single repository not only ensures quality and accuracy for analytics and new technology; it enables easy and secure data sharing at a time when collaboration is needed more than ever. But for many institutions, often the biggest question is where to begin?

We have been helping the Education sector with their data requirements for many years, and with our extensive knowledge and experience within the sector, we have developed the Data Analytics Accelerator for Higher Education - a packaged solution to accelerate your adoption of analytics.

“We chose to work with Simpson Associates to implement an Azure SQL Data Warehouse and Microsoft Analytics Suite, following a recommendation from Microsoft. Azure has given us the ability to scale up our systems when we need to do analytics on all the data we are collecting, and then scale down, thus optimising on cost without compromising performance.

Simpson Associates continuously deliver, and I wouldn't hesitate in recommending them in the future.”

Michael Dunmore

Deputy Director IT Services, University of Leicester

Why choose Simpson Associates' Data Analytics Accelerator for Higher Education?

- ✓ An end-to-end cloud-based analytical solution built in Microsoft Azure
- ✓ Overcomes your disparate data source challenges
- ✓ Improves visibility & confidence in your data
- ✓ Enabling better planning and decision making
- ✓ Rapid implementation - typically 4-8 weeks
- ✓ Tried and trusted by other Universities
- ✓ Skills transfer built in, allowing you to become self sufficient

What's included

-  Pre-designed data model for Admission
-  Connects to and exports data from your Student Information System (however, it's not limited to this, other source systems can be enabled)
-  Access to pre-created suite of Power BI reports
-  Application Support optional for peace of mind
-  Full Solution Documentation
-  Skills transfer built in

Why Simpson Associates?

- ✓ MS Gold Partner in Data Analytics, Data Platform, Cloud Platform and Datacenter
- ✓ Approved GCloud Supplier
- ✓ Experience working with many UK Universities on their Data Analytics implementations, including University of Leicester, London Business School, Salford University and Liverpool John Moores University
